The business which every county ought to produce.

A. C. Bowen, Marlon, Ohio, has cleared as one in Any Township on County. two months. \$2 for a test package was his first investment. When the first investment would be supported by Ozone it keeps perfectly sweet for months. Westment westment westment westment with the clucionati Feed Co., 498 West Seventh Street, is making \$5,000 a month in handling brewers' malt, preserving and shipping it as feed to all parts of the November 1st. \$2 for a test package was their first investment.

November 1st. \$2 for a test package was their first investment.

F. K. Raymond, Morristown, Belmont County, Onto, is clearing \$2,000 a month in handling and selling Ozone. \$2 for a test package was his first investment.

D. F. Webber, Charlotte, Eaton Co., Mich., has cleared \$1,000 a month since August. \$2 for a test package was his first investment.

J. B. Gaylord, 80 La Salle St., Chicago, is preserving eggs, fruit, etc., for the commission men of Chicago, charging 1%c. per doze nor eggs, and other articles in proportion. He is preserving \$3,000 dozen to keeps perfectly sweet for months. Write to any of the above parties and get the evidence direct.

Now, to prove the absolute truth of everything we have said in this paper, we propose to place in your hands the means of proving for yourself that we have not claimed half enough. To any person who doubts any of these statements, and who is interested sufficiently to make the trip, we will pay all travelings and hotel expenses for a visit of the commission of the commission who doubts any of these statements, and will pay all travelings and hotel expenses for a visit of the commission who doubts any of these statements, and will pay all travelings and hotel expenses for a visit of the commission who doubts any of these statements who is interested sufficiently to make the trip, we will pay all travelings and hotel expenses for a visit of the commission who doubts any of these statements and commission who doubts any of these statements are statement which we have made.

HOW TO SECURE A FORTUNE WITH OZONE.

month clear. \$2 for a test package was he first in the prove any statement that we have made.

A test package of Ozone, containing a sufficient quantity to preserve one thousand dozen eggs, or other articles in proportion, will be sent to any applicant on receipt of \$2. This package will enable the applicant to pursue any line of tests and experiments he desires, and thus satisfy himself as to the extraordinary merits of Ozone as a Preservative. After having thus satisfied himself, and had time to look the field over to determine what he wishes to do in the future—whether to sell the article to others, or to confine it to his own use, or any other line of policy which is best suited to him and to his township or county—we will enter into an arrangement with him that will make a fortune for him and rive us good profits. We will give exclusive township or country privileges to the first responsible applicant who orders a test package and desires to control of Ozone for any special territory, will enjoy a monopoly which will surely enrich him.

Don't let a day pass until you have ordered a Test Package, and if you desire to scure an exclusive privilege we assure you that delay may deprive you of it, for the applications come in to us by soores every mail—many by telegraph. "First come first served" is our rule.

If you do not care to send money in advance for the test package we will send it C. O. D., but this will put you to the expense of charges 'or return of money. Our correspondence is very large; we have Give your full address in every letter, and address your letter to

Maine Far

More To Be Learned ent of a large majority of our erous vegetable productions. ance in this direction though nighly satisfactory during the ew years ago our vast areas were regarded as of but little va purposes of fuel it is far inferio when exposed to the weather ren fit for fencing purposes. Now is ause use has been found for used in the manufacture of tooth per stock and for various other Vhite birch though making exc ly when exposed to the weather once regarded as one of the infer Yow it is very extensively us manufacture of spools and in where it flourishes, it is worth cord than old growth wood. We can remember when black ash was regarded as of but little nade very poor fuel, but in el meadow lands, acres of fine trees hauled up for fire-wood to get th most valuable woods, and for si poses is worth almost as much valnut. If they had been left one acre's growth of these to now be worth many times the v land that produced them. The of poplar and white birch has a to the material wealth of

products of our forests about wh yet know comparatively little. V ot investigation be made in this and why is it not more than pro such investigation might lead t covery of products in our own S night answer as substitutes ands or from remote parts of ountry? For our dye woods, w end almost entirely upon the p probable, that valuable coloring may be found in our own forests me of the lesser vegetable fam bark of the alder, the white map oak and several other trees and rich in tanning and an infusion o of these trees in connection with dye which readily imparts its woolens and some of the shades ained are very fine. This pha subject should be carefully in and we have no doubt that some nable would grow out of such their trees, and there are still man which we as yet know compara

tle. We recognize them perpha properties such as strength, beau ity, durability and adaptability for purposes in the arts, we may uch to learn. We are not spea of the more common forest is thoroughly familiar, but of t in certain localities. Some are The despised poplar was prove periments to be quite elastic a when properly treated, and wa some extent for hoe and pitch-fo and for material for hand rakes fore its present extensive use purposes was known. There are are not much used for any pur yet some of them might be particular uses, to good advant wood of the swamp pear (pyrus ar for instance, is exceedingly to makes excellent handles for fran sels and for other purposes w quality is required, yet how man ticle but we have said sufficien present purpose, which simply attention to the fact that the subj vegetable productions in their r the useful arts, is not yet exhaus

Grass Sood.

For several years past grass is needed in Maine is raised here. years ago the farmers of this only raised enough for home use, quantities were carried to Bos rotary horse-power mill for grid the seed was very common on while larger establishments run power were by no means uncomu mill for many years, and we are that there is one propelled by wa have often seen quite large areas and timothy left standing in the f laying was over, left for seed everal years past we have notice our farmers depend on a foreign We cannot speak from persons mee, but it seems to us that at prices which have been asked and grass seed during the past few ye profitable crop to raise. Years rmers could get eight or ten pound for clover seed, it was c netimes double these sums. We have always advocated mi

dry and we believe it to be policy of the farmer to produce farm sufficient to supply his ow supply of hay, corn, wheat a what we have just said, it is evid more grass seed ought to be g second year, and if it is desired to

saved for home use, if not for sal year brings an additional call for alany sections of Maine large ions of the State land must be every few years if a satisfactory to be kept up. It should be borne hat clover is a biennial plant and
